NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

For the three-month periods ended March 31, 2021 and March 31, 2020

(Tabular amounts in thousands)

1. Nature of operations

Green Rise Foods Inc. (formerly Green Rise Capital Corporation and hereinafter "Green Rise" or "the Company") is a grower of fresh produce with 51 acres of greenhouse ranges located in Leamington, Ontario. As noted in note 3, the Company acquired a second range in Kingsville, Ontario increasing the acres of greenhouse ranges that it owns and operates by 22 to 73-acres.

The Company's common shares are listed on the Toronto Venture Stock Exchange (the "TSX-V") under the trading symbol "GRF.V". The TSX-V approved the transaction on October 4, 2019.

On October 16, 2020 the Company officially changed its name from Green Rise Capital Corporation to Green Rise Foods Inc. The name change received shareholder approval at its annual general and special meeting of shareholders held on July 8, 2020 and from the TSX Venture Exchange on October 16, 2020.

The address of the Company's registered office is 47 Colborne Street, Suite 301, Toronto, Ontario, M5E 1P8, Canada.

The seasonal operation consists of the growing, packaging and the sale of produce to one major customer.

2. Basis of preparation

a) Statement of Compliance

The unaudited condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standard IAS 34 – Interim Financial Reporting. The unaudited condensed interim consolidated financial statements, prepared in conformity with IAS 34, follow the same accounting principles and methods of application as the most recent audited annual consolidated financial statements. Since the unaudited condensed interim consolidated financial statements do not include all disclosures as required by the International Financial Reporting Standards ("IFRS") for annual financial statements, they should be read in conjunction with the Company's annual consolidated financial statements for the year ended December 31, 2020.

The condensed interim consolidated financial statements were authorized for issue by the Board of Directors on May 27, 2021.

b) Accounting standards issued but not yet effective

A number of new accounting standards, amendments to standards, and interpretations have been issued but not yet effective up to the date of the issuance of the Company's unaudited condensed interim consolidated financial statements. The Company intends to adopt the standards when they become effective. The Company is currently assessing the impact of these standards to its financial statements. For a list of these new accounting standards, refer to the December 31, 2020 audited annual consolidated financial statements of the Company.

ESTIMATES:

Leases:

The Company uses judgement to determine the incremental borrowing rate used to calculate the initial liability and corresponding asset. The incremental borrowing rate is the rate of interest that a lessee would have to pay to borrow over a similar term, with a similar security, the funds necessary to obtain an asset of a similar value to the right-of use asset in a similar economic environment.

Estimated fair value of biological asset

The estimates and underlying assumptions are reviewed on an ongoing basis. The most significant estimates include those related to the valuation of biological assets (Note 4). Biological assets are measured at the fair value less costs to sell, which is calculated as expected sales of harvested biological produce, less costs to sell and costs to complete. Management estimates the sales price of the produce on the vine by utilizing actual sales prices in the following period, estimates the expected yield based on historical production and estimates the costs to sell and costs to complete, which includes packaging and transportation costs. Stage of growth and remaining costs to complete for in-progress produce are estimated by management based on historical production. The estimated inputs are subject to fluctuations based on the timing and prevailing growing conditions and market conditions.

JUDGMENTS:

Bearer assets

The classification of bearer assets is a significant judgment. Expenditures for bearer assets are recorded in investing activities on the statement of cash flows. Bearer assets are depreciated based on the estimated yield profile of the plants over their life. The amounts and timing of recorded expense for depreciation of bearer plants for any period are affected by the estimate of useful lives.

3. Mor Gro Farms Inc. Net Asset Acquisition

On February 1, 2021, the Company purchased a greenhouse property and accompanying land, located in Kingsville, Ontario, for a purchase price of $15.9 million. The transaction constitutes a business combination under IFRS 3 – Business Combinations. In accordance with the acquisition method of accounting, the purchase price has been allocated to the underlying assets acquired and liabilities assumed, based primarily on their estimated fair values at the date of the acquisition. The Company used a combination of a direct comparison approach and a discounted cash flow model (net present value of expected future cash flows) to determine the fair value of the assets acquired. The purchase price allocation is summarized in the following table:

Purchase Price Cash Consideration[1]	***($000s)***
Total Cash Consideration	**15,858**
Net Identifiable Assets Acquired	
Property, plant and equipment	18,455
Bearer plants	811
Other assets	180
Accounts payable and contracts assumed	(960)
Deferred tax liability	(696)
Total net assets acquired	17,790
Bargain purchase gain	1,932

1. The purchase price allocation for the Mor Gro Farms Inc. net asset acquisition is not final and subject to change as the Company completes the valuation of the assets acquired and liabilities assumed.

4. Bearer plants & Biological assets

Bearer plants

A reconciliation of beginning and ending balance of bearer plant assets is as follows:

($000s)	**March 31, 2021**	December 31, 2020
Bearer plants – beginning of the period	**392**	-
Additions	**3,547**	2,563
Impairment in bearer plants	**(1,068)**	-
Depreciation of bearer plants	**(4)**	(2,171)
Bearer plants – end of the period	**2,867**	392

Bearer plant costs of $2,867 as at March 31, 2021 consist of costs directly attributable to bringing the bearer plants to the location and condition necessary for them to be capable of operating in the manner intended by management, including costs of site preparation. As a result of mechanical malfunction in its newly acquired Mor Gro Farms Inc. greenhouse, the Company made the decision to replant replacing the bearer plants which resulted in an impairment charge of f $1,068.

Biological assets

The Company did not have any biological assets as at December 31, 2020 however it did have biological assets as at March 31, 2021, consisting of tomatoes growing on the vines. These tomatoes were harvested and sold in the second quarter. The growing cycle for each harvest is approximately six weeks.

The change in carrying value of the Company's biological assets is as follows:

($000s)	March 31, 2021
Biological assets – beginning of the period	-
Net change in unrealized gains due to biological asset transformation	1,143
Biological assets – end of the period	1,143

In determining the carrying amount of biological assets, which are measured at fair value less costs to sell, the following significant unobservable inputs, all of which are classified as Level 3 on the fair value hierarchy, are used by management as part of this model:

- Selling price and yield – determined using the actual selling price per pound and yield in the following period; and
- Post-harvest costs – calculated as the harvesting and overhead costs for the six weeks following period, consisting of the cost of direct and indirect materials and labour related to packaging.

During the quarter the Company entered into a first mortgage agreement with the Royal Bank of Canada in the amount of $13,000 for a term of seven years. The mortgage bears interest at 2.85% per annum with monthly payments of $89 representing blended payments of interest and principal. Proceeds from this mortgage were used entire to fund the Mor Gro Farms Inc. asset acquisition which closed on February 1, 2021 (refer to note #3).

In December 2020, Bull Market entered into a second loan agreement with the Royal Bank of Canada in the amount of $5,000 for a term of three years. The second loan bears interest of 1.95% per annum with monthly payments of $32 representing blended payments of interest and principal. Proceeds from this mortgage were used entirely to repay a $5,000 promissory note that was used to fund the purchase of Bull Market on June 15, 2018. This promissory note bore interest of 5.5% per annum with payments of $23 monthly representing interest only.

In 2018, Bull Market entered into a first loan with the Royal Bank of Canada in the amount of $17,500 for a term of five years. The loan bears interest of 3.99% per annum with monthly payments of $129 representing blended payments of interest and principal.

Credit Facility

On November 16, 2020, the Company's credit facility was increased by $1,500 to $3,500. On January 13, 2021 the Company's credit facility was increased by an additional $1,500 to $5,000. As at March 31, 2021 there was $3,159 drawn (December 31, 2020 nil). The facility must be paid by the end of the fiscal year, is repayable on demand and carries an interest rate of bank prime plus 1.00% per annum.

13. Financial instruments

The Company's financial assets and financial liabilities have been classified into categories that determine their basis of measurement. These amounts are initially recognized at fair value and subsequently are measured at amortized cost. The fair value of these amounts approximates their carrying values. All other assets and liabilities are determined using Level 3 of the fair value hierarchy.

Fair values of financial instruments are determined by valuation methods depending on the hierarchy levels as defined below:

- Level 1 – quoted market price in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted market prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. observed prices) or indirectly (i.e. derived from prices); and
- Level 3 – inputs for the assets or liabilities that are not based on observable market data.

Long-term debt	Financial liabilities	Amortized cost	32,836	20,198

Management of financial risk

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk and interest rate risk.

Credit risk

The exposure to credit risk arises through the failure of a customer or another third party to meet its contractual obligations to the Company. The Company believes its maximum exposure to credit risk as at March 31, 2021 is the carrying value of its trade receivables (cash and trade receivables as at December 31, 2020). As at March 31, 2021 all trade receivables were held with its one customer and all amounts were collected subsequent to the period ended.

Liquidity risk

Liquidity risk is the risk the Company will not be able to meet its obligations as they fall due. It is the Company's intention to meet its obligations through the collection of current accounts receivable and cash from sales. The Company has in place a planning and forecasting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company is exposed to risks related to seasonality as there is limited revenue from January through March. If the current resources and cash generated from operations is insufficient to satisfy its obligations, the Company has a credit facility of $5,000 (December 31, 2020: $3,500) of which $3,159 was drawn as at March 31, 2021 (December 31, 2020: $NIL). The Company ensures there is sufficient available capital to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its cash holdings.

All current liabilities are expected to be settled within one year.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's loans have fixed rates of interest and are therefore subject to the risk of changes in fair value if the prevailing interest rate were to increase or decrease.

Management of capital risk

The Company's objectives when managing capital are to safeguard its assets and maintain a competitive cost structure, continue as a going concern and provide returns to its shareholders. In addition, the Company works with all relevant stakeholders to ensure the safety of its operations and employees and to remain in compliance with all environmental regulations.

14. Commitments and Contingencies

As at March 31, 2021, the Company did not have any purchase commitments.

Purchase commitments consist primarily of commitments to pay for raw material inputs for the 2021 Crop that were entered into during the period but delivered to the Company's greenhouse ranges subsequent to the period end.

The Company has entered into an agreement with a customer for a 10-year period to supply produce at prevailing market prices.

Contingencies

The Company may be involved in legal proceedings from time to time arising in the ordinary course of business. Contingencies will be accrued when the outcome if probable, and the amount can be reasonably estimated. Based on the Company's knowledge of events at March 31, 2021, no such matters were identified.
